## Research interests

---

My research focuses on the emergence of complexity in material systems, with a particular emphasis on synchronization and pattern formation in mechanical networks, condensed matter, and fluid mechanical systems. I utilize classical tools from applied mathematics and novel machine learning (ML) approaches to discover and characterize mechanisms behind complex phenomena. Current topics of interest are ML-enabled system identification and reduced order modeling, symmetry concepts (including chimera states, dimension reduction methods, and converse symmetry breaking), metamaterial and band-gap design and associated complex phenomena such as localized states and anharmonic responses, nonlinear waves and patterns in parametrically driven systems, and the kinetics of granular materials, glassy systems, and topological defects.

## Education and employment

---

<b>University of Washington</b>	Seattle, WA
Department of Applied Mathematics	04/2020-
Acting Instructor & Washington Research Foundation Postdoctoral Fellow	
<b>University of Massachusetts Boston</b>	Boston, MA
Postdoctoral researcher with Jason R. Green (continuation of NU work)	09/2019-02/2020
<b>Northwestern University</b>	Evanston, IL
Postdoctoral researcher with Adilson E. Motter	10/2016-08/2019
<b>California Institute of Technology</b>	Pasadena, CA
Doctor of philosophy in Physics	09/2011-06/2017
Dissertation: Symmetry and variational analyses of fluid interface equations in the thin film limit	
Advisor: Sandra M. Troian, Department of Applied Physics	
<b>University of Cambridge</b>	Cambridge, UK
Master of Advanced Study (Part III), Department of Applied Mathematics and Theoretical Physics Graduated, graduated with merit	10/2010-07/2011
<b>Northwestern University</b>	Evanston, IL
Bachelor of Arts in Physics, Mathematics, and the Integrated Science Program, GPA: 3.83/4.0, graduated with Honors	09/2006-06/2010
A01/ISP101 Programming Instructor, 2009-10	
Undergraduate Research Assistant, 2008-2010	
A01/ISP101 Programming Tutor, 2008-09	

## Honors and awards

---

- Washington Research Foundation Postdoctoral Fellowship award, 2021-2024.
- First place, 2019 Scientific Images Contest, Northwestern Science in Society, 2019.
- Finalist in the GSNP student speaker award at the 2016 APS March Meeting, 2016.
- National Science Foundation Graduate Research Fellowship Program, 2010-13.
- Graduated with Merit, University of Cambridge Part III Mathematics, 2011.
- Outstanding Senior Thesis in Physics and Astronomy, Northwestern University, 2010.
- Undergraduate Research Internship (academic year), Northwestern University MRSEC, 2008-10.
- Summer Research Grant, Northwestern University, Summer, 2009.
- Barry M. Goldwater Scholarship, 2009.
- Katherine L. Kriehbaum Scholarship, Northwestern University, 2009.
- Phi Beta Kappa Honor Society (inducted as Junior), 2009.
- Sigma Pi Sigma Physics Honor Society (inducted as Junior), 2009.
- Best Junior in Physics, Northwestern University Physics Department, 2009.
- Outstanding Achievement in Mathematics by a Junior, Northwestern University Mathematics Department, 2009.

## Technical skills

---

- Analytic approaches
  - Symmetry analysis, dimension reduction, Lyapunov functions, and variational methods
  - Linear stability analysis, asymptotic and perturbative approaches, and bifurcation analysis
- Numerical approaches
  - Programming in Python, C, C++, Mathematica, Matlab
  - Open source developer (PySINDy github repository)
  - PDE/ODE integration with finite elements, finite differences, and (pseudo)spectral and collocation methods
  - Parallelization with OpenMP, BLAS/LINPACK, CUDA, Bash scripting, and Slurm

## Conference organization and peer review

---

- NeurIPS 2024 Workshop D3S3 reviewer, Vancouver, Canada 2024.
- NetSci-X 2024 program committee member, Venice, Italy 2024.
- Physics-Informed Machine Learning seminar series organizer, University of Washington AI Institute in Dynamic Systems, Seattle 2021.
- NetSci 2020 program committee member, Rome, Italy 2020.
- NetSci-X 2020 program committee member, Tokyo, Japan 2020.
- International School and Conference on Network Science 2018, program committee member, Paris 2018.
- 9th International Conference on Complex Networks, program committee member, New England Complex Systems Institute, 2018.
- APS March Meeting 2018, focus session organizer (Session V47), Los Angeles, 2018.

- Network Frontier Workshop, organizing committee and emcee, Northwestern University, 2017.
- Reviewer for physics journals: Nature Materials, Phys. Rev. Lett., Phys. Rev. B, Phys. Rev. E, Phys. Rev. Research, Physica A: Statistical Mechanics and its Applications.
- Reviewer for mathematics journals: Nonlinearity, Chaos, Communications in Nonlinear Science and Numerical Simulation, Complex Networks, Nonlinear Science.
- Reviewer for engineering journals: ACS Nano, Mechanical Systems and Signal Processing, Sustainability.

## Seminars and selected invited presentations

---

- Heteroclinic birth of a preponderance of states in the ring of Janus oscillators (invited minisymposium talk), Dynamics Days Europe 2024, Bremen Germany (July 2024).
- Complex localization mechanisms in networks of coupled oscillators, Dynamics Days 2023, Davis, CA (January 2024).
- Data-driven band gap and bifurcation design in heterogeneous driven systems, 2023 Gordon Research Conference on Collective Behavior, Newry, ME (August 2023).
- Data-driven discovery and extrapolation of parameterized pattern-forming dynamics (invited special session talk) AMS Western Sectional Meeting, University of Utah (October 2022).
- Data-driven discovery of parameterized pattern-forming dynamics and emergent quantum mechanics (invited Physical Mathematics Seminar talk), MIT Department of Mathematics (September 2022).
- Diverse effects of noise in oscillator networks (invited minisymposium talk) SIAM Conference on Applications of Dynamical Systems (May 2021).
- Diverse effects of noise in oscillator networks (invited Faculty Seminar talk). Kadir Has University, Turkey (November 2020).
- Critical switching behavior in globally attractive chimeras (invited Sydney Dynamics Group Seminar talk), University of Sydney (May 2020).
- Symmetry and asymmetry in oscillatory patterns (invited LANS Informal Seminar talk), Argonne National Laboratory (September 2019).
- Multifaceted dynamics of Janus oscillator networks (invited minisymposium talk). SIAM Conference on Applications of Dynamical Systems (May 2019).
- Computational physics inspires new insights in nature and technology (invited Physics Seminar talk), Physics Department at University of Wisconsin Whitewater (September 2018).
- Chimera states in continuous media (invited conference presentation). Topical Problems in Nonlinear Wave Physics, Moscow-St. Petersburg, Russia (July 2017).

## Mentoring, teaching, and outreach

---

- Student and research mentor at Northwestern and University of Washington
  - University of Washington Master's student Leqi Wang, Dynamics on Manifolds with Symmetry  
⇒ Letter of recommendation for L. Wang, accepted to Ph.D. at McGill University.
  - University of Washington undergraduate students Xinyue Zhang & Xiyi Wang, Experimental Faraday Apparatus, Data Collection, and Processing (ongoing research, with funded AI Institute summer position for Xiyi Wang).  
⇒ Letter of recommendation for X. Wang, accepted to Master's at Carnegie Mellon.

- University of Washington undergraduate students Benjamin Jiang & Qichen Xu, System identification with Nonlocal Interactions for Granular Materials (ongoing research, with funded AI Institute summer position for Qichen Xu).
  - ⇒ Letter of recommendation for Q. Xu, accepted to Ph. D. at University of Chicago.
  - ⇒ Letter of recommendation for B. Jiang, accepted to Master's at University of Washington.
- University of Washington undergraduate students Yihui Chen & Guanyu Huo, Parameterized Pattern Formation with SINDy (published in Phys. Rev. Research 2023).
  - ⇒ Letter of recommendation for X. Wang, accepted to Master's at Carnegie Mellon.
  - ⇒ Letter of recommendation for G. Huo, accepted to Master's at Columbia.
- University of Washington Ph. D. student Joseph Williams; System Identification for Vortex Shedding and Driven Granular Material Experiments (ongoing research).
- University of Washington visiting scholar Pauline Brumm (TU Darmstadt); System Identification for Gravure Printing.
- Northwestern undergraduate student Fiona Brady; application material review (now graduate student at Princeton University).
- Northwestern graduate student Daniel J. Case; Faraday Wave instabilities (published in Nat. Comm. 2021).
- Northwestern graduate student Yuanzhao Zhang; Critical Switching Chimera States (published in Phys. Rev. X 2020).
- Northwestern undergraduate student Bohan Xu in quantum decoherence (published in Phys. Rev. A 2019).
- Member of the University of Washington Department of Applied Mathematics Diversity, Equity, and Inclusion Committee
  - Organizer for the Women in Applied Mathematics Mentorship (WAMM) Program, matching graduate women mentors with undergraduate mentees.
  - Organizer for the Pre-Application Review (PAR) program, offering graduate school application review to prospective undergraduates from underrepresented groups.
  - Organizer and presenter for the annual Departmental Climate Orientation and Climate Check-In events, laying out expectations and resources to current and incoming graduate students and soliciting student input to guide the committee activities.
  - Organizer for the annual Winter Diversity, Equity, and Inclusion Week, hosting educational presentations and social events highlighting cultural diversity in the department.
- Co-founder (with Sarah Wellons) of postdoc mentoring program at Northwestern
  - Organized ice cream social events to introduce postdocs and students.
  - Matched 15 Physics and Astronomy grad students with postdocs from other groups.
- Teaching assistant at Caltech with excellent reviews (4.7/5 for overall teaching effectiveness among 22 evaluations in 5 courses)
  - "Zac is a fantastic TA, and was always available to answer questions about the problem set, the course, or physics in general. He has a broad base of knowledge and never hesitates to explain things in ways deeper than you might have first imagined."
  - "Zach was an excellent TA. He was always willing to talk about the homework and class material when he was in his office (which was most of the morning and afternoon), and he was very knowledgeable about the subject. He definitely put in quite a bit more time than most other TA's will spend on classes. He was also quite approachable, which is always refreshing."
  - "Zach was not only extremely helpful outside of class, but also in lecture as he would interject to clarify points or answer students' questions with infallibly perceptive and insightful comments. His office hours were 'by appointment,' which effectively meant 'any time—day or night'. He is a genuinely nice person and always seemed happy to help, no matter how long it took."

- Volunteer tutoring with special needs students in Caltech Y Rise program Two hours per week for one year in high school physics and chemistry.
